Supplier

### Features

- PRINCE2, MSP, DSDM Atern (Agile) and our generic methods
- Management tools, eg document management, approvals, assurance
- Project controls - plans, risk, issues, cost, resource management, notifications
- Wide range of standard reports which can be customised
- Standard and customisable dashboards
- Project, programme, portfolio and departmental analysis and reporting
- Use our free planning tool or use MS Project
- Sophisticated permissions management; unlimited number of projects and users
- Full audit trail, QA audit and governance features
- Centralise all your project documents in one place

### Benefits

- Quick set up off-the-shelf
- Easy to adopt using the tools that users know well
- Instant projects using the unique Method Template approach
- A single repository for information provides consistency and saves time
- Generates confidence through powerful assurance and audit tools
- Improves communication with instant access to project information
- Delighted stakeholders: information is available to sponsors and stakeholders
- Flexible operation: use Browser app or Windows app
- Fit for purpose: provides the tools used on typical projects
- Cost effective: does not require consultancy support to set up

Live Edition provides all the same great features as the other PROJECT in a box platforms with the added benefits of being provided over the Cloud and in a SaaS model. This means you and your chosen customers, partners and suppliers can use it from anywhere and on any device with internet access which supports a browser.

Unlike other vendors cloud solutions where everyone uses the same lowest common denominator functionality and you have no choice about version upgrades etc., with Live Edition you have a dedicated instance of the server, this means you can still take advantage of the unparalleled flexibility in PROJECT in a box to customise. This includes the ability to personalise your Methodologies, reports, dashboards and data models so you can have a system which matches your needs not you having to adjust to match a system.

Using the best in Cloud standards Live Edition features an easy to use Browser interface which will run on any device meeting the typical day to day user requirement and this is supported by a Windows App for the desktop environment for either administrators or advanced users. This gives the best of both worlds, uncluttered ease of access for most users and sophisticated tools for those who need them.

LIVE EDITION

PROJECT in a box as a SaaS solution for your organisation. Amazing value starting at just £8.33pppm.

PROJECT in a box

"Your own Project Support Office"

Pricing

Live Edition consists of a base package which provides 30 users (5 Managers, 15 Team and 10 View Only) and all hosting service. This is an annual package and equates to just £8.33 pppm.

Additional users can be added to the base package as follows:

- Manager £16pppm
- Team member £10ppm
- View Only £2pppm

An unlimited usage licence also exists and is £2,500per month for one organisation in one country.

If you are a public sector organisation you can procure Live Edition via the G Cloud Marketplace without the need for the usual complex tendering processes.
